Product description

A complete hands-free kit for mobile telephones in the car. The headset can be worn on the left or right ear and is also suitable for spectacle-wearers. Number are dialed by saying the name of the person you want to call (if the mobile phone supports this function) or via the telephone's conventional mechanism. Calls are accepted and disconnected, and the volume controlled, by pressing a button on the headset. The headset automatically adjusts the volume to the surrounding noise level and the battery charge time offers up to 5 hours of talk time or 7 days in standby mode.

Sales features/benefits

- Ability to make/receive telephone calls while driving without distraction.
- Simple pairing with the mobile phone.
- Low-cost hands-free device in the BMW design.
- Excellent voice quality thanks to the short distance between the mouth and microphone.
- High wearing comfort thanks to low weight (8 grams) and soft gel earpiece.
- The headset can easily be secured onto and removed from the ear during the journey with one hand.
- Also ideal for use outdoors, in the office or at home.
- Excellent compatibility with popular mobile phones.

Supplied package

- Bluetooth headset
- Charger cable for the 12 V socket
- Soft earpiece in three sizes
- Multi-lingual manual

Technical information

No installation, coding or programming required!

Note
